Experience

Hack2Skill

February 2026 – Present

Software Engineer II

Noida, India

- Led end-to-end frontend development of the **Google PromptWars Community** platform, architecting configurable initiative workflows and complex multi-step forms for large-scale community programs.
- Led frontend performance optimization initiatives, improving Lighthouse Performance from **25–30** to **90+** and reducing the production bundle size by **4×** (**20 MB** → **5.3 MB**) through Brotli compression, build optimization, dependency analysis, and code splitting.
- Architected and maintained a tree-shakable internal replacement for **moment** and **moment-timezone**, reducing the production bundle size by an additional **5%** while improving maintainability through comprehensive documentation.

QSS Technosoft

April 2023 – January 2026

Software Engineer

Noida, India

Cardiac Health

- Architected and shipped a **Dockerized DICOM-to-WebM/Image conversion microservice** using **Python**, **FFmpeg**, and AWS ECS, reducing processing latency by **70%** through architectural and pipeline optimizations.
- Developed core healthcare workflows including Express Mode, DICOM measurement tools, authentication/authorization, and an automated reporting system that extracts DICOM measurements using **ReactJS**, improving diagnostic efficiency and reducing manual effort.
- Managed production AWS infrastructure by configuring **EC2**, auto-scaling **ECS** tasks, and monitoring with CloudWatch, ensuring reliable deployments and maintaining **99.9%** uptime.

Seven Hills

- Developed scalable healthcare features including a custom **DICOM/PACS** viewer, reporting system, patient management, ABHA integration, and Stripe integration using **ReactJS** and **NodeJS**.
- Diagnosed and resolved a critical **CouchDB** performance bottleneck (beam.smp high CPU usage), optimizing EC2 configuration to reduce API response times from **15s** to **2–4s**, significantly improving application performance and stability.

Education

Bachelor of Technology, Computer Science & Engineering

2019 - 2023 May

School of Management Sciences

8.19 CGPA

Technical Skills

Frontend: **ReactJS**, JavaScript, TypeScript, HTML, CSS, Bootstrap, Material UI, TailwindCSS.

Backend: **NodeJS**, ExpressJS, Python, Microservices.

Databases: MongoDB, CouchDB, MySQL, PostgreSQL.

Cloud & DevOps: AWS(EC2, ECS, ECR, SNS, CloudWatch, Lambda), CI/CD, Docker.

Core CS Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems.

Tools & Others: Git, GitHub, Postman, Stripe, FFmpeg.

Open Source and Extracurricular

- Open Source Contributor to **Terax AI (5.3K+ GitHub stars)**, implementing Git file status indicators in the file explorer, and contributing production-ready features through community-reviewed pull requests.
- Technical Blogger on **HashNode** and **Medium**, authoring 15+ articles on web development and data structures with **4,000+ total views**, helping beginners adopt modern coding practices.
- Open Source contributor in Hacktober Fest 2021 and 2022.
- Project Mentor in PEC Winter of Code - (Jan - March 2023) - [Link](#)
